

Better PDF Exporter for Jira

10,000+ teams
Cloud & Data Center, since 2005

Transform Jira data into professional PDF documents, with one click.

+ Better PDF Automation included, free

Pinterest · SAP · Mercedes-Benz
JPMorgan Chase · Adobe · EU Commission

WHO IT'S FOR

Project & product managers

One-click status reports, release notes, and sprint summaries for stakeholders who don't use Jira.

Finance & accounting

Invoices, timesheets, and reconciliation reports straight from Jira data, especially with Tempo.

Compliance & audit leads

Automated, timestamped audit documentation for SOC 2, PCI, or FDA reviews.

Jira admins & Atlassian consultants

Extend Jira's reporting for the whole org, with custom templates for specialized needs.

Business analysts

Professional data exports for analysis, presentations, and external communication.

WHEN TO BRING IT UP

"How do you share Jira project data with people outside your organization?"

"How long does it take to compile a status report or release notes from Jira?"

"Can you generate audit-ready documentation from Jira today?"

"Are you manually copying Jira data into documents for stakeholders?"

"Do you rely on Jira dashboards or boards for stakeholder communication?"

30-SECOND PITCH

Better PDF Exporter transforms Jira data into professional PDF documents with one click, from any Jira screen including dashboards, boards, and reports, which no other app can do. Fully customizable templates produce branded reports, invoices, compliance documentation, and release notes. Pair it with the free Better PDF Automation to schedule and distribute reports automatically. Trusted by 10,000+ teams including the EU Commission, JPMorgan Chase, and Mercedes-Benz.

WALK-AWAY SIGNALS

No reporting needs beyond what Jira shows on screen. Looking only for interactive BI dashboards. Very small team with no external stakeholders, clients, or audit requirements.

NEXT STEPS

Documentation

midori-global.com/.../cloud/documentation

Export samples

midori-global.com/.../cloud/export-samples

THE PROBLEM, IN ONE LINE

Jira's native export is CSV or a browser print. Neither produces a document you'd hand to a client, an auditor, or an executive.

WHAT ACTIVE CUSTOMERS VALUE MOST

Template customization, by far.

"Flexible Groovy and Velocity customization enabled successful exports." BDO USA, on adjusting templates to their own document standards.

Exports no other app offers.

RedScreen (Atlassian Solution Partner) uses it specifically for Jira dashboard exports, still a capability unique to this app.

It keeps earning renewals.

"Flawless display of historic sequence of production events." Etion Create, a customer for 9 years.

BY THE NUMBERS

10,000+

teams run Better PDF Exporter today

\$5,000/yr

saved on license costs, reported by Morosystem (Telecom)

TOP OBJECTIONS, ANSWERED

"Jira already has export built in."

CSV loses formatting; browser print can't touch dashboards or boards. This is the only app that can.

"We just copy data into Word or PowerPoint."

Customers go from 1+ hour of manual work to seconds, and automation removes the manual step entirely.

"Too small to justify a reporting app."

One weekly manual report already costs 50+ hours a year. The automation companion is free.

WHY MIDORI

- Cloud Fortified and Platinum Marketplace Partner, building Atlassian apps since 2005.
- SOC 2 Type II and GDPR compliant.
- Works alongside 20+ Jira apps, including Tempo Timesheets and Advanced Roadmaps.
- 30-day free trial, with full functionality.
